PROFILE SUMMARY

Self-taught Fullstack Developer transitioning from aviation operations, focused on building and deploying modern web apps using React ecosystem. Experienced in TypeScript, Next.js and Postgresql, with hands-on experience shipping features and fixing bugs in production environments.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python
Frameworks and Tools: React, Next.js, Node.js, Tanstack Query, Prisma, Postgresql, Better Auth, Git
Concepts: REST APIs, Authentication & Authorization, CRUD Operations, API Integration, Deployment & CI/CD

PROJECTS

Mealio.ai – Weekly Meal Planner & Nutrition Tracker (<https://mealio-nine.vercel.app/>)

Technologies: Next.js, Tanstack Query, ZOD, Prisma, PostgreSql

- Built a full-stack meal planning platform with authentication, nutrition tracking, and weekly meal organization.
- Built scalable and reusable frontend architecture using modular components and shared utilities.
- Built responsive dashboard interfaces with reusable forms, filtering, and dynamic CRUD functionality.

FeedlyX – Mini Social Feed App (<https://feedlyx.vercel.app/>)

Technologies: Next.js, Prisma, PostgreSql, Clerk

- Built a full-stack social media feed application with post creation, image uploads, likes, comments, and authentication.
- Designed responsive feed interfaces with reusable components, optimized rendering, and seamless user interactions.

Lumo – Product Catalog App (<https://lumo-r44p.onrender.com/>)

Technologies: React, Node.js, Express.js, PostgreSql, Tanstack Query

- Built a full-stack product catalog app with product management, comments, authentication, and API integration.
- Developed responsive CRUD functionality and efficient server-state handling.

EXPERIENCE

Welldone Health

April 2026 – April 2026

Software Developer Intern (Frontend)
Remote

- Resolved frontend bugs and UI inconsistencies in a production healthcare app improving overall user experience.
- Debugged API integration issues, identified endpoint failures, and improved frontend error handling using dev tools.
- Implemented new user flows and reusable UI components, including patient onboarding and ABHA integration features.
- Assisted with deployments, Git merge conflict resolution, and production build debugging using AWS Amplify.

InterGlobe Aviation LTD

August 2023 – May 2025

Aviation Security Executive
Guwahati, India

- Operated XBIS/XCIS imaging systems to detect anomalies and analyze complex screening data with 100% accuracy.
- Managed critical aviation security operations while maintaining strict compliance with international safety protocols.
- Worked in high-throughput environments, prioritizing time-sensitive operations to prevent delays and maintain workflow efficiency.

EDUCATION

Assam Don Bosco University

August 2020 – August 2023

Bachelor of Computer Applications (CGPA: 7.34)
